Clearstream is a trademark of Clearstream Services S.A.

Swift is a registered trademark of the Society for Worldwide Interbank Financial Telecommunication.

Clearstream Banking S.A. is a Deutsche Börse Group company.

Foreword

On 15 June 2026, Clearstream will implement changes related to Swift.

This document consolidates and updates the details of these changes to enable clients to make any required changes.

The respective documentation and user guides associated with the impacted products and services will be updated to reflect the enhancements in due course.

Further information

The client testing window via OCCT will be available from 20 April 2026. Clients are strongly encouraged to use this period to validate their systems and reconciliation processes ahead of production availability.

For further information about our products and services, please visit www.clearstream.com or contact Clearstream Client Services or your Relationship Officer.

You will find the relevant contact details at www.clearstream.com, under Contacts & Client Services.

Clearstream Release June 2026

Contents

camt.052 – Interim Money Suspense Report	4
camt.053 - Money Statement Report and Cash Balance Report	5
camt.054 - Bank-to-Customer Debit Credit Notification	5
MT-MX mapping for bank transaction codes.....	6

Executive summary

On 15 June 2026, as part of Clearstream's ongoing commitment to the timeliness and quality of our services to clients, Clearstream will implement quality enhancements to our existing services. The services impacted and a summary of the enhancements can be found below.

CBPR+ ISO 20022 June 2026

- Addition of new pain.001 and pain.02 messages.
- New fields in camt.052, camt.053 and camt.054 messages.

CBPR+ ISO 20022

The scope for June 2026 Release includes the introduction of new messages and the addition of new fields to existing messages. These enhancements are designed to support smoother and more efficient cash reconciliation processes. The complete guidelines, including the updated fields, are already available on the Swift “MyStandards” portal under the Clearstream group, within the CBPR+ community

Note: The pain.001 and pain.002 messages are not supported by Clearstream Fund Centre (CFCL)

pain.001 - Customer Credit Transfer Initiation

The pain.001 is an ISO 20022 Customer Credit Transfer Initiation Message used by corporate clients to instruct a bank to execute credit transfers. The pain.001 format is a structured XML-based message that replaces the traditional MT101 format. Existing MT101 (Request for Transfer) Corporate-to-Bank messages will continue to be supported in parallel, and there is no immediate requirement for clients to migrate from MT101 to pain.001.

pain.002 Customer Payment Status Report

The pain.002 message is a Customer Payment Status Report used in financial transactions to inform the initiating party about the status of a previously submitted payment instruction. This is limited to notifications of rejected or partially rejected payment instructions, in accordance with Clearstream’s Usage Guidelines.

The complete message formats, data usage rules and validation requirements for pain.001 and pain.002 are available on the SWIFT MyStandards portal under the Clearstream CBPR+ community.

Sample pain.001 and pain.002 messages will be provided in due course, prior to the commencement of the testing window.

Bank Transaction Codes in Statements and Reporting Messages

As part of the June 2026 release, Bank Transaction Codes in statement and reporting messages (camt.052/053/054) will go live with the structured usage of Domain, Family, and Sub-Family elements within the <BkTxCd> component, in line with ISO 20022 standards. To ensure continuity and avoid any potential misunderstanding during client migration, the MT Bank Transaction Codes will continue to be included alongside the structured codes.

Clients who are ready may consume the Domain, Family, and Sub-Family information, while clients who are not yet prepared can continue to rely on the Proprietary Bank Transaction Codes until they complete their readiness activities. This dual approach provides flexibility and ensures a smooth transition without impacting existing integrations.

Example:

```
<BkTxCd>
  <Domn>
    <Cd>SECU</Cd>
    <Fmly>
      <Cd>CORP</Cd>
      <SubFmlyCd>RHTS</SubFmlyCd>
    </Fmly>
  </Domn>
  <Prtry>
    <Cd>NSEC</Cd>
    <Issr>CUST</Issr>
  </Prtry>
</BkTxCd>
```

camt.052 – Interim Money Suspense Report

M/O	Field	Description	Usage
/Document/BkToCstmrAcctRpt/Rpt/TxsSummry/TtlCdtNtries			
0	Total Credit Entries <i>TxsSummry/TtlCdtNtries</i>	Specifies the total number and sum of credit entries.	NumberAndSumOfTransactions1 <ul style="list-style-type: none"> is_choice: false
